

What is the SEG web-based Mentoring Program?

A source for advice regarding career direction in the broad field of economic geoscience

www.segweb.org/mentoring

Designed with young professionals and student geoscientists in mind.

Volunteer members are experienced SEG members from Exploration and Mining Industries, Universities, Consulting and Government Surveys.

Mentors are Geologists, Geochemists, Mineralogists, and Geophysicists from around the world.

We communicate in several languages; French, Spanish, English, German, Italian, Russian, Indonesian, Chinese, Hindi and Afrikaans.

The SEG web-based Mentoring Program is not an employment bureau; however, we can provide direction and recommend the right type of work, research ideas, programs, careers, and which companies, universities and geological surveys to contact according to your needs and circumstance.
