SEG Student/Professional Member 2012-Present

SEG Student Chapter President (UNLV) 2013-2014

SEG Student Fieldtrip Participant (Iberian Pyrite Belt)-2012

### Personal Philosophy on Mentoring

As a recent graduate and early career professional in the mining industry I've recently struggled with the questions facing many students today. Do I want to go to graduate school right away or work for a while? Should I stay with academia or work in industry? What are employers looking for in a resume? If I don't have an answer to your question, I'll try to connect you with someone who does because I feel all students should have as much guidance as possible when trying to decide what career path is right for them. There is no reason others shouldn't benefit from the experiences of myself and my colleagues.

### Languages Comfortable Communicating With

English
