

SEG Foundation Student-Dedicated Field Course

Iberian Pyrite Belt

~~May 14 – May 21, 2012~~ **May 12 – May 19, 2012**

Field Course Leaders: Dr. William X. Chávez, Jr., New Mexico Institute of Mining and Technology and Dr. Erich U. Petersen, University of Utah

A ninth in the series of SEG Foundation-sponsored student field courses and will emphasize the geology and ore deposits of the Iberian Pyrite Belt, spanning the Iberian Peninsula of southern Portugal and southwestern Spain. Mine visits will include Neves Corvo, Aljustrel, Rio Tinto, Aznalcollar, São Domingos, Aguas Teñidas, and Las Cruces near Sevilla. The geologic setting, alteration and mineralization in each of the mine areas will be reviewed in outcrops, drill cores, open pits and underground. A detailed itinerary will be posted in due course on the SEG website.

The field course will begin on **Saturday evening, May 12th** in Lisboa, Portugal and conclude in Lisboa on **Saturday, May 19th**. Travel throughout the duration of the course will be via charter bus (mobile classroom).

The course is open to students worldwide. Course participation is limited to a maximum of 20 students; selection of participants is competitive with strong preference given to SEG Student Members. The application form and instructions for students will be available at: www.segweb.org/students/SEGF-SFT-AppForm.pdf.

Up to four professionals may participate in the course; those interested should contact Borden Putnam of the SEG Foundation for further information:
bputnam@mionecapital.com

Application Deadline: March 15, 2012

Inquiries may be directed to: studentprograms@segweb.org
