Fax: 1.720.981.7874

Bookstore: www.segweb.org/store

Publication date: September 2014

On the cover: Map showing the regional geology of the Lake Superior area illustrating wide variety of mineral deposit types (modified from D. M. Peterson, 2013). See p. 2.
CONTENTS

Introduction
George J. Hudak and Dean Peterson .................................................. 1

Part 1 - Day 1. Lithostratigraphy, Hydrothermal Alteration, and Mineralization .............................................................. 5

Field Trip [Introduction]. ................................................................. 35
Field Trip Stops [Day 1]. ................................................................. 38

Part 2 - Day 2. Cu-Ni-PGM Deposits of the Duluth Complex ......................... 63

Field Trip Stops [Day 2]. ................................................................. 64

Part 3 - Day 3. Drill Core Examination ................................................ 79

PolyMet NorthMet Deposit ............................................................. 92
Teck American Mesaba Deposit ..................................................... 111
Twin Metals Minnesota Maturi Deposit ........................................... 127

References ................................................................. 141
