Syllabus – Field Guide	
<i>Introduction</i>	1
<i>Southwest Ghana Regional Geology</i>	7
<i>Site Visits</i>	
<i>Iduapriem (Teberebie)</i>	23
<i>Damang</i>	33
<i>Wassa</i>	45
<i>Prestea</i>	59
<i>Obuasi</i>	73
<i>Homase-Akrokerri</i>	91
<i>Obotan-Esaase</i>	105
<i>Chirano</i>	131
<i>Ahafo</i>	145
<i>Akyem</i>	157
References	167
Appendices	
<i>Appendix I: Cost Definitions</i>	175
<i>Appendix II: Chronology of Key Events</i>	180

List of Figures and Tables

Figures

1-1.	Simplified geological map of the West African craton with gold deposits.....	2
1-2.	Cretaceous palinspastic reconstruction of the Guiana and south West Africa shields	3
1-3.	Simplified geological map of southwest Ghana with mineral belts	5
1-4.	Comparison of the world's 25 largest Precambrian orogenic Au deposits	6
1-5.	Grade-tonnage diagram for West African orogenic Au deposit resources.....	6
1-6.	Stratigraphic column of southwest Ghana.....	8
1-7.	Age dating from southwest Ghana ore deposits	9
1-8.	Tectonic evolution in southwestern Ghana	10
1-9.	Compilation of histograms presenting radiometric age data	11
1-10.	Simplified geologic map of the Ashanti Belt.....	14
1-11.	Cross-section across the Ashanti Belt.....	15
1-12.	Total magnetic intensity reduced to pole over first vertical derivative of the Ashanti Belt.....	16
1-13.	Bouguer gravity map over the Ashanti Belt.....	17
2-1.	Satellite image of the Tarkwa district	24
2-2.	Geology of the Tarkwa-Damang gold district.....	25
2-3.	Type cross-section through Tarkwa	26
2-4.	Stratigraphic column of southwest Ghana.....	28
2-5.	Stratigraphic subdivisions of the Banket Series at the Tarkwa gold mine.....	29
2-6.	Iduapriem mining blocks	31
3-1.	Location map of Damang showing generalized geology.....	34
3-2.	Stratigraphic succession of the Tarkwa Group at Damang.....	35
3-3.	Mining bench plan from the Damang deposit	36
3-4.	Damang area regional geologic map and cross-section.....	37
3-5.	Photos of drill core and outcropping shear zone at Damang	38
3-6.	Styles of gold-bearing extensional quartz veins in walls of the Damang pit.....	39
3-7.	Diagrams of the various styles of mineralized quartz veins at Damang	40
3-8.	Longitudinal projection of orebodies at Damang	40
3-9.	Kinematic model for gold-bearing quartz vein development at Damang.....	41
3-10.	Structural model for quartz vein development at Damang.....	42
4-1.	Location map of Wassa showing generalized geology	46
4-2.	Soil geochemistry anomaly map over the Wassa deposit	48
4-3.	Detailed geology of the Wassa mine, showing resource model gold distribution	49
4-4.	DD core samples and thin sections of main host rocks at Wassa	50
4-5.	Cross-section through the Wassa Main deposit showing ore zones	51
4-6.	Cross-section through the Wassa Main deposit showing Eburnean folding.....	52
4-7.	Detailed magnetic interpretation of the Wassa area	53
4-8.	Examples of Wassa mineralization	54
4-9.	Synthesis of events at Wassa and the regional evolution.....	55
4-10.	Longitudinal projection of select thicker drill intersections in the B Shoot.....	56
4-11.	Longitudinal projection of B Shoot orebody and potential down plunge extension	57
4-12.	Cross-section through the geotechnical stress model of the crown pillar	58
5-1.	Location map of Prestea	60
5-2.	Satellite image of Bogoso and Prestea	61
5-3.	Location and simplified geology of the Prestea and Bogoso deposits.....	62
5-4.	The four major litho-structural units exposed at Prestea open pit.....	63
5-5.	Oblique view of 3-D resource model of the Prestea orebodies	63
5-6.	Mine Level 17 drill plan with vein intersections and structural contours	64

5-7.	Cross-section 8200N through the West Reef.....	65
5-8.	West Reef vertical longitudinal projection	66
5-9.	DD core photos of West Reef mineralization styles.....	67
5-10.	Prestea general infrastructure layout	68
6-1.	Satellite image of Obuasi mining district	74
6-2.	Simplified regional geology and location of Obuasi and other major gold mines	75
6-3.	Images from a typical underground stope showing a rock bolting machine installing ground support at Obuasi.....	77
6-4.	Obuasi Au production and AISC cost trends from 1q2013 to 2q2014	78
6-5.	Location, geology plans, and cross-section of Obuasi district	79
6-6.	Map of major structures and distribution of open pits within the Obuasi district.....	80
6-7.	Location of Obuasi gold mine along the Axim-Konongo shear zone	81
6-8.	Simplified cross-section through the Obuasi deposit, showing shear structure	82
6-9.	DDH core photo of quartz vein with free gold, Obuasi.....	83
6-10.	Vertical longitudinal projection of the Obuasi gold mine	84
6-11.	Vertical longitudinal projection of the Obuasi gold mine showing reserve model blocks and infrastructure.....	85
6-12.	Longitudinal projection through the Obuasi mine showing high-grade shoots.....	86
6-13.	Oblique schematic view of the old and new mine design, Obuasi	87
7-1.	Location of Homase-Akrokerri project	91
7-2.	Outline of the old Akrokerri underground mine workings projected to surface, Akrokerri town	93
7-3.	Location of > 20 ppb gold-in-soil anomalies along the Homase-Akrokerri trend	94
7-4.	Detail of the central gold-in-soil anomaly covering Akrokerri to Homase	95
7-5.	Photo of open pit mining of the Homase oxide	96
7-6.	Photograph of the flooded Homase open pit	96
7-7.	Simplified geology of the Obuasi, Akrokerri, and Homase district with simplified structure	97
7-8.	Cross-section through the Homase open pit with drill results.....	98
7-9.	Plan of areas of gold in soil anomalies at Homase and Akrokerri with locations of Homase pit and proposed pits.....	99
7-10.	Versatile Time Dome Electromagnetic (VTEM) image with mineralized zones highlighted.....	100
7-11.	Detailed aeromagnetics survey showing location of Homase-Akrokerri NE-trending mineralized structure passing through Homase.....	101
7-12.	Oblique 3-D image of the Homase resource block model showing exhausted and planned pits	101
7-13.	Vertical longitudinal profile of the Homase resource block model	102
7-14.	Photograph of illegal artisanal mining at Akrokerri	103
8-1.	Location and geological map of Asanko Gold Mine assets.....	105
8-2.	Location map of Asanko Gold tenements.....	106
8-3.	Asanko tenements showing distributions of gold in soils geochemical anomalies	109
8-4.	Regional total field aeromagnetic image of the Ashanti Belt and Kumasi Basin.....	111
8-5.	Geological map of Asanko tenements showing major lithologies, structures, and gold prospects	113
8-6.	Geological map of the Nkran pit area.....	114
8-7.	Cross-section through the Nkran pit	115
8-8.	Esaase deposit interpreted structural geology	117
8-9.	Nkran Mineral Resource Estimate (MRE) progression and reconciliation audit work programs from 2014 to 2016-178-10	118
8-10.	Oblique view into Nkran pit geological model, comparing 2014 and 2016 interpretations.....	119
8-11.	Nkran MRE block models comparison	120
8-12.	Cross-sections through Nkran MRE block models showing the new interpretations of the two dominant structural ore controls	121
8-13.	Nkran and Total Obotan MREs over time	125
8-14.	AISC (all in sustaining cost) international gold production cost curve positions of Asanko P5M and P10M.....	126

8-15.	Contrasted basic mine plans and outputs of the P5M and P10M mining scenarios.....	127
8-16.	Nkran pit NPV and cost per ounce Whittle optimization scenarios	128
9-1.	Satellite image of the Chirano mine region.....	131
9-2.	Satellite image of the Chirano mine and infrastructure.....	132
9-3.	Regional geologic setting of the Chirano deposits	134
9-4.	Location and geology of the Chirano district	135
9-5.	Cross-section through the Obra deposit	137
9-6.	Geologic level plan of the large Obra deposit	138
9-7.	Plan view of typical shape and sizes of various Chirano gold deposits	139
9-8.	Schematic models of structure development and controls on gold mineralization	140
9-9.	Block model cross-section through the Akwaaba deposit showing gold grades.....	141
9-10.	Survey crew in the Chirano open-pit.....	142
9-11.	Typical working face at Chirano underground	142
10-1.	Satellite image of the Ahafo mine region	145
10-2.	Ahafo location map with regional geology	146
10-3.	Site map of Ahafo South and Ahafo North.....	147
10-4.	Ahafo regional geologic map.....	149
10-5.	Photographs of pit walls showing ductile folding and extensional shear vein	150
10-6.	Simplified geologic plan map and cross-sections of the Awonsu and Apensu deposits	151
10-7.	Satellite image (annotated) showing the locations of the four open pits at Ahafo	152
10-8.	Cross-section of Subika	153
10-9.	Oblique view of Subika geological model superimposed on the open pit.....	154
10-10.	DD cores showing increasing intensity of alteration and mineralization	155
11-1.	Location map for Akyem in southwest Ghana.....	158
11-2.	Simplified cross-section from early exploration stage of the Akyem discovery.....	159
11-3.	Attributed simplified cross-section of Akyem	160
11-4.	Block model cross-section of the Akyem deposit emphasizing high grade mineralization	161
11-5.	Vertical longitudinal projection showing strong surficial gold enrichment and strong grade continuity along the thrust	162
11-6.	Early schematic geologic map with stream sediment anomaly Au values	163
11-7.	Schematic map of preliminary geochemical signature of the Akyem deposit	163
11-8.	Akyem mining site layout.....	165

Tables

1-1.	Resource and Reserve Data for Orogenic Gold Deposits in West Africa.....	4
